About Me

I'm a 14-year-old front-end web developer from De Hoge Schans 15, 5246AR Rosmalen, Netherlands. I'm passionate about turning cool ideas into amazing website designs.

I've mastered HTML, CSS, and JS, which helps me craft websites that are functional and look awesome. Despite my age, I prioritize making websites user-friendly and enjoyable.

My goal is to ensure your website looks great and is super easy to navigate. Even though I'm young, I've been involved in designing websites for some exciting projects. Let's collaborate and bring your vision to life online!

What I'm Doing

Web Design

Crafting sleek and state-of-the-art designs with a pro touch.

Web Development

Professionally building top-notch websites from the ground up.

Testimonials

Nizar

We engaged Muhammad for our corporate identity needs. His expertise in Web Design...
